Teamwork and collaboration are why the automotive industry turns to Henkel's complete solutions.

- ◆ Henkel is the market leader in adhesives, sealants and surface treatments to the transportation industry. Backed by extensive design capabilities, a broad product range, specific application knowledge, technical expertise, and powerful brands, the company provides significant economic and environmental advantages for today's vehicles - making them safer, more comfortable and extending vehicle value.

Advanced Chemical Solutions

With products and expertise in every segment of the automotive industry, Henkel engineers and chemists know the importance of understanding both the full scope of manufacturing processes as well as the complex challenges of very specific needs. These needs are met with a deep chemical knowledge that enables Henkel to respond with the most innovative solutions. As a result, engineers at today's leading OEMs, systems integrators and tiered suppliers trust Henkel in all segments of the industry - automotive body, interior, chassis, electronics and powertrain production.

Delivering Innovative Solutions

Henkel's engineers have been at the forefront of developing pre-treatment systems and coatings for corrosion protection of fully assembled vehicles. Other highlights include high performance structural and acoustic foams, modern adhesives and sealants, and powertrain solutions including liquid applied gaskets.

Loctite branded products are just one of Henkel's many powertrain solutions

Complete Solutions by Henkel

Henkel focuses on the entire process so that systems are bundled for maximised manufacturing efficiency and cost reduction opportunities. Henkel experts work along side your process engineers to make sure it's built right, works right and is serviced for the long term. Henkel products are used throughout the manufacturing process, which is a testament to the success of the complete solutions approach.

One-Stop Supplier for Chemicals

The breadth of Henkel's brands and depth of its product expertise have been supporting automotive assembly for more than 75 years. Manufacturing thousands of products in over 100 countries, Henkel is engaged in all segments of the automotive industry - automotive body, interior, chassis, exterior and powertrain. This unmatched, comprehensive portfolio makes Henkel the single source for automotive chemical solutions.

About the Automotive Group of Henkel

You will likely recognise many Henkel products under the leading brand names of Loctite™, Teroson™, Bonderite™, Frekote™, P3™, and Multan™. Henkel's commitment to global R&D initiatives helps the company continue the expansion of its broad portfolio of products, technology, and brands. The automotive group of Henkel ranks in the Top 150 global suppliers to the automotive industry.

About Henkel

The Henkel Group operates in three strategic business areas: Home Care; Personal Care; and Adhesives, Sealants, and Surface Treatments - of which the automotive group is part. Henkel employs more than 50,000 people around the world, and its products are sold in 125 countries worldwide. ■
